

Session II: Control & Optimization

Wednesday Morning

Time	Speaker and Title
15:45 - 16:10	Jawad Salhi Control and stabilization of degenerate/singular hyperbolic systems.
16:10 - 16:35	Soukaina Ezzroual Using infinitesimal symmetries for computing the first Maxwell time in the geometric control problem on $SH(2)$.
16:35 - 17:00	Hind Elbaggari Heat Kernel for heat equation with inverse square potential and dynamic boundary conditions.
17:00 - 17:25	Samia Moustaid Switching Problem and Reflected Backward Stochastic Differential Equations.
17:25 - 17:50	Soufiane Boumasmoud The Impact Of Delay On Second Order Evolution Equations.
17:50 - 18:15	Amine Sbai Some new results on the controllability of parabolic and hyperbolic problems.
