

Session I: Advanced Numerical Linear Algebra & Optimization

Tuesday Afternoon

Time	Speaker and Title
15:45 - 16:10	Parisa Ahani Fleet Replacement Decision Optimization: Models and Approaches.
16:10 - 16:35	Rohollah Garmanjani Worst-Case Complexity of Trust-Region Methods for Multiobjective Optimization.
16:35 - 17:00	Anas Elhachimi Non-negative Einstein tensor factorization for unmixing hyperspectral images.
17:00 - 17:25	Pietro Benedusi Scalable Approximation And Solvers For Ionic Electrodiffusion In Cellular Geometries.
17:25 - 17:50	Mohamed Jalal Maaouni GPU-Accelerated Approaches in Tensor Singular Triplet Approximation.
17:50 - 18:15	Abdellatif Mohssine A New Combination of Polynomial Extrapolation Methods and Multigrid Solvers for IGA Applied to Linear and Nonlinear Elliptic PDEs.
